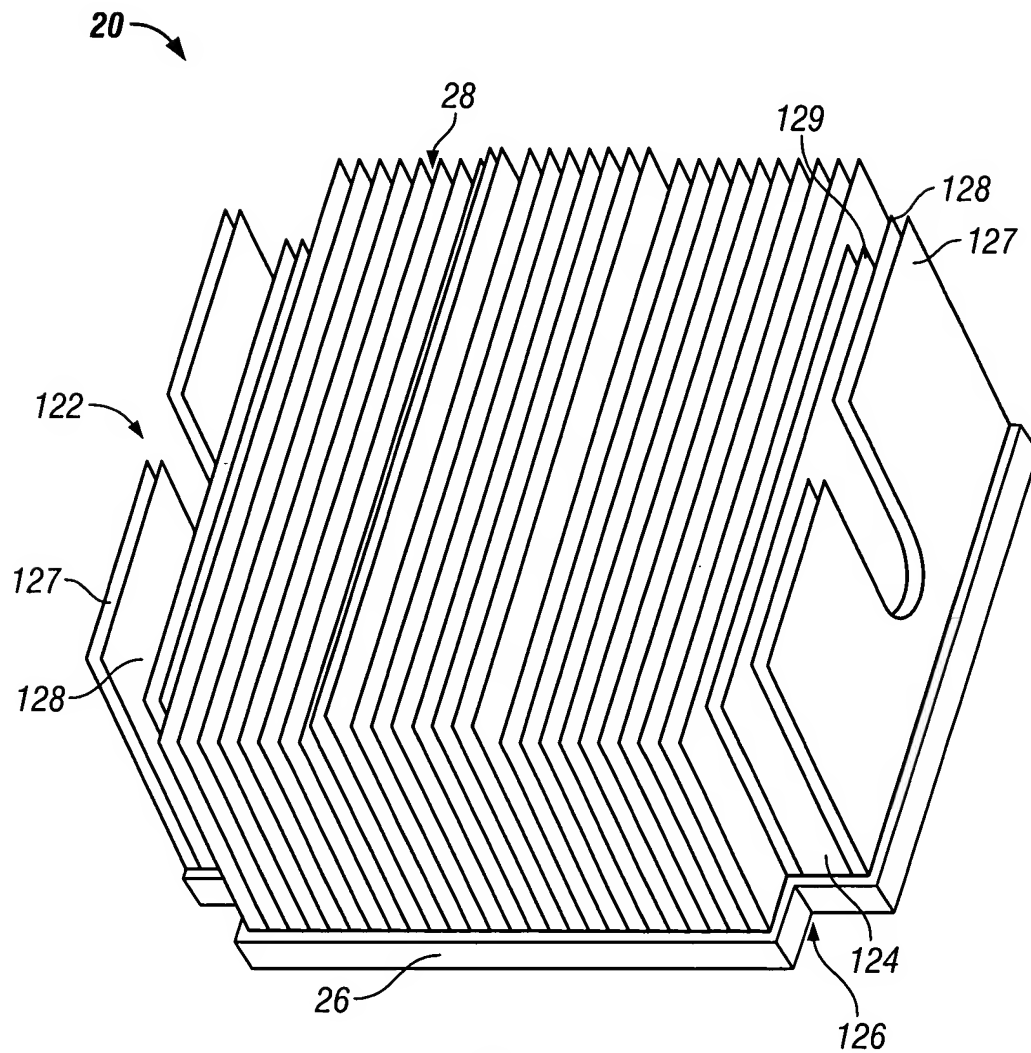

FIG. 7

FIG. 10 is a perspective view of a second embodiment of the device. It shows a similar assembly to FIG. 9, with a base plate 78 supporting a vertical support 74. The central component 20 is mounted on a horizontal shaft 42, which is supported by bearings 44. A handle 36 is attached to the side of the central component 20. Various other components are labeled with reference numerals.
